Subject: test: no glowbug radio info in this msg

Jeff-

You should RX this message from the following sources.

atl.org

bob@atl.org (bob@office.atl.org may be buried in headers too)

karishma.com (without a trailing '.')

all should show up pretty close to the same time

Subject: Electron microscope

I don't recall whether I mailed to glowbugs or not but am making progress with the Electrom Microscope. Even if I can't get it going as a microscope, it has some interesting possibilities for messing around with tubes as there are approx 20 wires fed through to a terminal block inside the vacuum chamber.

These *are* the people putting out the QSTs in conjunction with the
ARRL. They've now got 1970 and later out, and hope to have everything
out by the end of the year.

Subject: National MB-150

Folks:

I picked up a National MB-150 Multi-band tank circuit from WJ ford Surplus
last week. I plan to use it in a single ended amp using a HF-100 with about
150 watts input. Has anybody had experience with this tank circuit? From
the add in the 1950 ARRL Handbook, it is supposed to tune 80 thru 10 meters
without coil changes.

Hi All,

I came across this 812 at a hamfest and it followed me home! Nice 4 amp
filament!;-)

Any idea's what I might do with it, if it works?
If it don't?
